MEMORANDUM FOR: Chief, DFD-DD/F

ATTENTION: SUBJECT: Comparison Study - Plotted Frames and Ephemeris
on 9009

1. Attached hereto is a comparison study between the geographic coordinates of the principal point of the frames as plotted and the geographic coordinates of the frame as shown by the ephemeris.

2. As of this date, the geographic coordinates of the nadir, as determined by PIC/TIB, are not available and will be sent as soon as possible. It was felt, however, that the other information may be of some assistance at this time.

3. The information enclosed does not cover Pass 2. On Pass 2 it was impossible to determine the location of the principal point of any of the frames because of the extreme nose-up attitude of the vehicle, weather conditions, etc.

Chief, TIBD
